

## The one-of-a-kind power combo for color-consistent campaign printing: Proofgate Module PGM and Productionserver 6

Provide your demanding customers integrated Color Management in the highest possible quality: ColorGATE's innovative DeviceProof technology guarantees a maximum in identical color output for any motif, even if you are using different systems, media and printing processes (water-based, solvent, UV, latex) – and without having to generate a system-specific PDF.

### Top productivity at sensational value for money

Proofgate Module PGM and the brand-new Productionserver 6 Color Copier Edition now allow you to conveniently standardize all the toner-based and LFP systems in your production environment for perfect network integration – the system can be accessed from any workplace and any application.

## Digital proofing based on international standards

**The productive solution for successful day-to-day business**

Proofgate 6 – Achieve optimal production reliability and maximum color accuracy more easily than ever before:

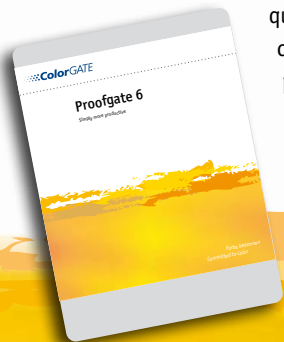

- ▶ Legally binding digital proofing based on ISO standard 12647-7 and FOGRA reference values
- ▶ Integrated FOGRA media wedge and evaluation with reporting function for certified proofs
- ▶ Pre-defined job and workflow settings for automated processes

Custom-made for in-house and corporate users:

- ▶ Design and advertising agencies
- ▶ Marketing and communication departments
- ▶ Pre-press companies and departments

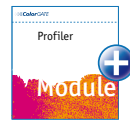

Unique: Media Device Synchronization MDS, a ColorGATE development, makes it possible to recalibrate all the printing systems connected to your system quickly and directly. Any deviations in color are corrected in no time at all – the guarantee for proofing results in high-end quality.

Including high-quality DeviceLink profiles for many current, international standard printing specifications – allows adjustments to the individual proofing system without any new profiling necessary.

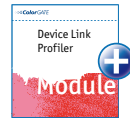

**Many opportunities for expansion**

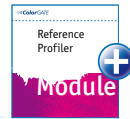

Thanks to the modular architecture of all the ColorGATE Product Solutions, you can add what you need to Proofgate 6 at any time and adapt the system to meet new requirements – with such powerful modules as these:

**Profiler PFM**  
Assistant-supported generation of professional ICC profiles

**Device Link Profiler DLPFM**  
Workflow-specific optimization for visually as well as measured first-class proofs

**Reference Profiler RPFM**  
Reference profiles for any printing system (digital / offset / screen / photo)

**FOGRA-certified: CG Isoproof 200**

Our semi matte high-end proofing paper for water-based inkjet systems from Canon · Epson · HP – Brilliant color reproduction and the finest color nuances even in dark and shadowed sections of the image.

CG Isoproof 200 profiles for all the popular proofing printers are already included with all the ColorGATE Product Solutions that use proofing technology.

**The best in information – Consulting you can count on**

The internationally tried-and-tested Proofgate technology offers you many more opportunities to increase your productivity and the range of services you offer.
