Stylus Pro 4900

Epson Stylus Pro 4900

A combination of remote proofing capabilities, fast print speeds, high levels of automation and a super-wide colour gamut make the Epson Stylus Pro 4900 a highly productive workhorse for the small office or studio environment.

This compact 17-inch production printer sets new standards in colour precision for pre-press, packaging, design, commercial photographs and fine art reproduction. Achieving 98% PANTONE®* coverage, the Stylus Pro 4900 boasts outstanding colour consistency and accurate colour matching, and Epson's 11-colour UltraChrome HDR inks and Advanced-TFP print head guarantee a professional finish every time.

The Stylus Pro 4900's automatic colour certification and calibration produces high-quality remote proofs. The optional inline SpectroProofer ensures consistent, repeatable colour accuracy when using different media, rapidly measuring control strips and colour charts when creating ICC profiles and print verification results.

With production speeds of up to 46m² per hour and minimal maintenance requirements, the Stylus Pro 4900 boosts studio productivity. The high-capacity front-loading cassette makes inserting paper easy, and automated paper changing means no time is wasted switching between cut sheet and roll paper. The printer switches automatically between pre-installed photo and matte black inks, and all inks come in high-capacity cartridges for less frequent changes and better value.

The Stylus Pro 4900 can print on a range of media up to 1.5mm thick, including thick photo or presentation matte board, canvas and fine art paper – and paper paths include cassette, top and front manual board feed or roll.
